Fetal Alcohol Spectrum Disorders (FASD): A Brain-Based Approach

- ✓ What is FASD?
- ✓ How does it impact the brain?
- ✓ What to do about behaviors linked to FASD
- ✓ Practical, individual strategies for reducing unwanted behaviors.

**Presented by
Families Affected by
Fetal Alcohol Spectrum
Disorder
fafasd.org**

**Space provided by
The Governor's Institute**

Special guests:
Elizabeth Montgomery Lee,
FASDinNC
Kathy Hotelling,
NCFASD Informed, Inc.

Description:

The 2-day workshop includes current information on fetal alcohol spectrum disorders and an individualized process for providing a brain-based approach when working with and caring for people with FASD.

We will cover: changes in the developing brain when exposed to alcohol, current modes and best practices for diagnosis, a neurobehavioral profile of FASDs, and how to understand negative behaviors associated with brain differences and respond differently to help people with FASDs.

If you are parenting or working with a person with suspected or documented FASD and nothing seems to work, this workshop will help explain why, and provide real solutions for you, your family, or your client.

Our presenter, Adrienne Ehlert Bashista is the Training Director of FAFASD and has been teaching parents and professionals about FASDs since 2013. She lives in Florence, Massachusetts with her husband and two sons. She welcomes inquiries into training: adrienne@fafasd.org / 413 570 5966.

Time & Place:

Opportunity Conference Room,
Governor's Institute, 1121 Situs
Court, Suite 325, Raleigh, NC
May 2, 9-4; May 3, 9-12

**This workshop has changed the
dynamics in our home for the better. I
would recommend it to anyone who
parents or has contact with a
developmentally delayed child,
including teachers and grandparents.**

~Linda Q, Mom to 3 Special Children

**Thank you again for your
presentation. I honestly have never
enjoyed ANY training as much as your
workshop! I appreciated the
information that you gave because
you gave real examples of why things
worked and didn't work with FASD
kids.**

*~ S.S., mom to a teenager with an
FASD*
